

The Grundfos 12V DC Solar Pump is used in split pumped solar water heating systems to circulate hot water from the geyser to the collector and comes with a warranty of 1 year.

Features

- High efficiency
- Small size and weight
- Easy installation
- Control for hot water circulation

Specifications

- Rated Voltage (Vm): 12VDC
- Rated Total Capacity: 4LPM
- Rated Head: $\geq 1.3\text{m}$
- Power Consumption (Vm : 12V): 8W
- Operating Current (Vm : 12V): 0.65A
- Minimum Circulating Fluid Temperature: 20°C
- Maximum Circulating Fluid Temperature: 95°C
- Noise Level: 35dBA
